

Collins  
String to keep arms  
counter swinging correctly.

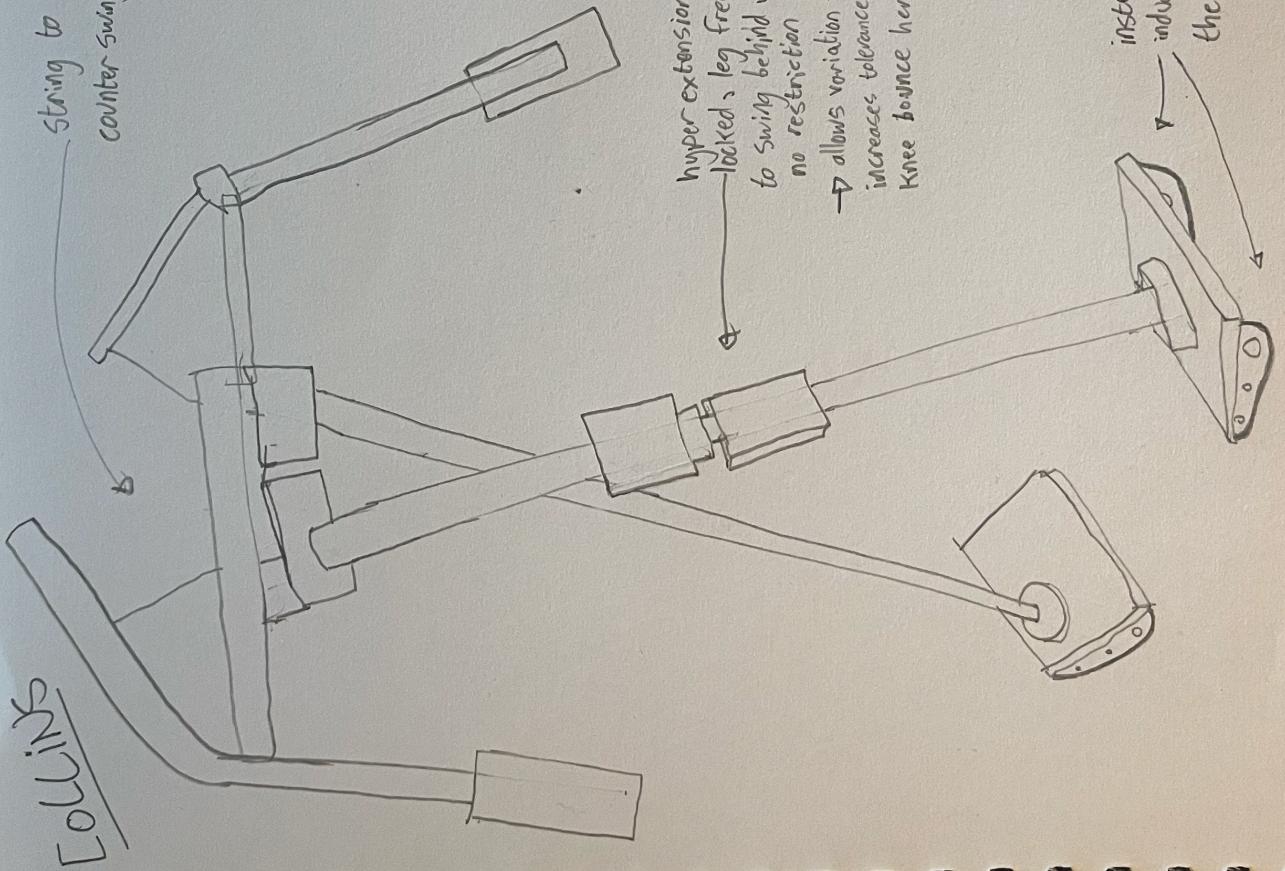

Previous year student

- recreation of the  
Collins walker.  
- Some differences

hyper extension knee  
locked, leg free  
to swing behind with  
no restriction  
→ allows variation +  
increases tolerance to  
knee bounce here

locked  
range of motion  
back and forward

instead of spring, forced rocking  
induced by a larger foot rail on  
the inside + smaller on outside

inside foot rail  
0 0 0  
outside foot rail  
0 0 0  
20° planter vs 5° dorsi
